

KIMBLE HIGH PRESSURE MANIFOLD TRAILER

KIMBLE CHASSIS OFFERS HIGH PRESSURE MANIFOLD TRAILERS FOR WELL STIMULATION!

About Kimble Manufacturing

Kimble Manufacturing Company designs, manufactures, and assembles purpose built vehicles, manifold trailers, hydraulic frac pumps, and heavy duty trailers.

All units are designed and built in our 130,000 square foot facility completed in 2008. The Building features 750 feet of straight line flow with efficient material delivery, in line blast/paint systems and final assembly area.

Frac units are tested under full load conditions at our onsite test pad which is capable of simulating pressure pumping with 3 units.
